

# HOME-WORK RELAY

Adaptable homes and short links between home and work

01 / SPATIAL BACKBONE

## One public relay spine that can step back

A conceptual relation from rail heritage to doors, courtyards, desks and service entries

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

01 Rail and park

Keep the public path ahead of any building discussion

02 Three stations

Research-living, family transition and arrival respond to different life stages

03 Four dwellings

Short stay, project rental, adaptable home and long-term community coexist

04 Ordinary route

Every digital service keeps a staffed, paper or offline alternative

Provisional constraint is not a redline; replace and recalculate when official polygons arrive

HOME-WORK RELAY / EPSG:4548 recomputation

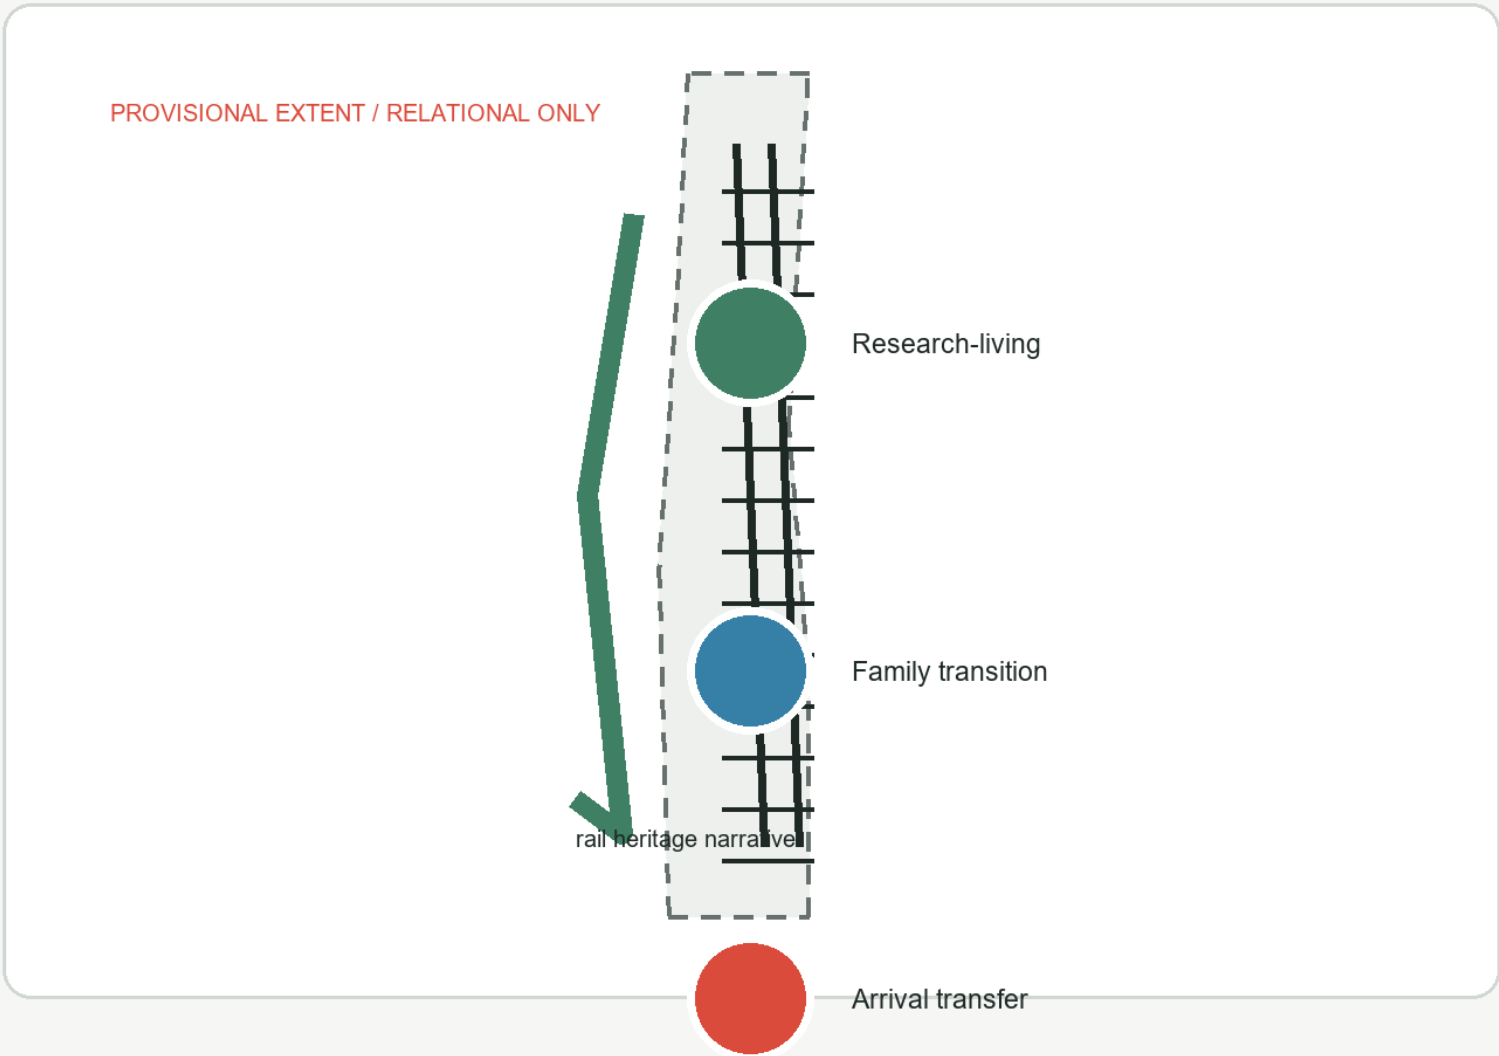

# The spatial problem

A change should not cut off housing, desks and daily services

## 01 / SPATIAL BACKBONE

### One public relay spine that can step back

A conceptual relation from rail heritage to doors, courtyards, desks and service entries

#### 01 Rail and park

Keep the public path ahead of any building discussion

#### 02 Three stations

Research-living, family transition and arrival respond to different life stages

#### 03 Four dwellings

Short stay, project rental, adaptable home and long-term community coexist

#### 04 Ordinary route

Every digital service keeps a staffed, paper or offline alternative

Provisional constraint is not a redline; replace and recalculate when official polygons arrive

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

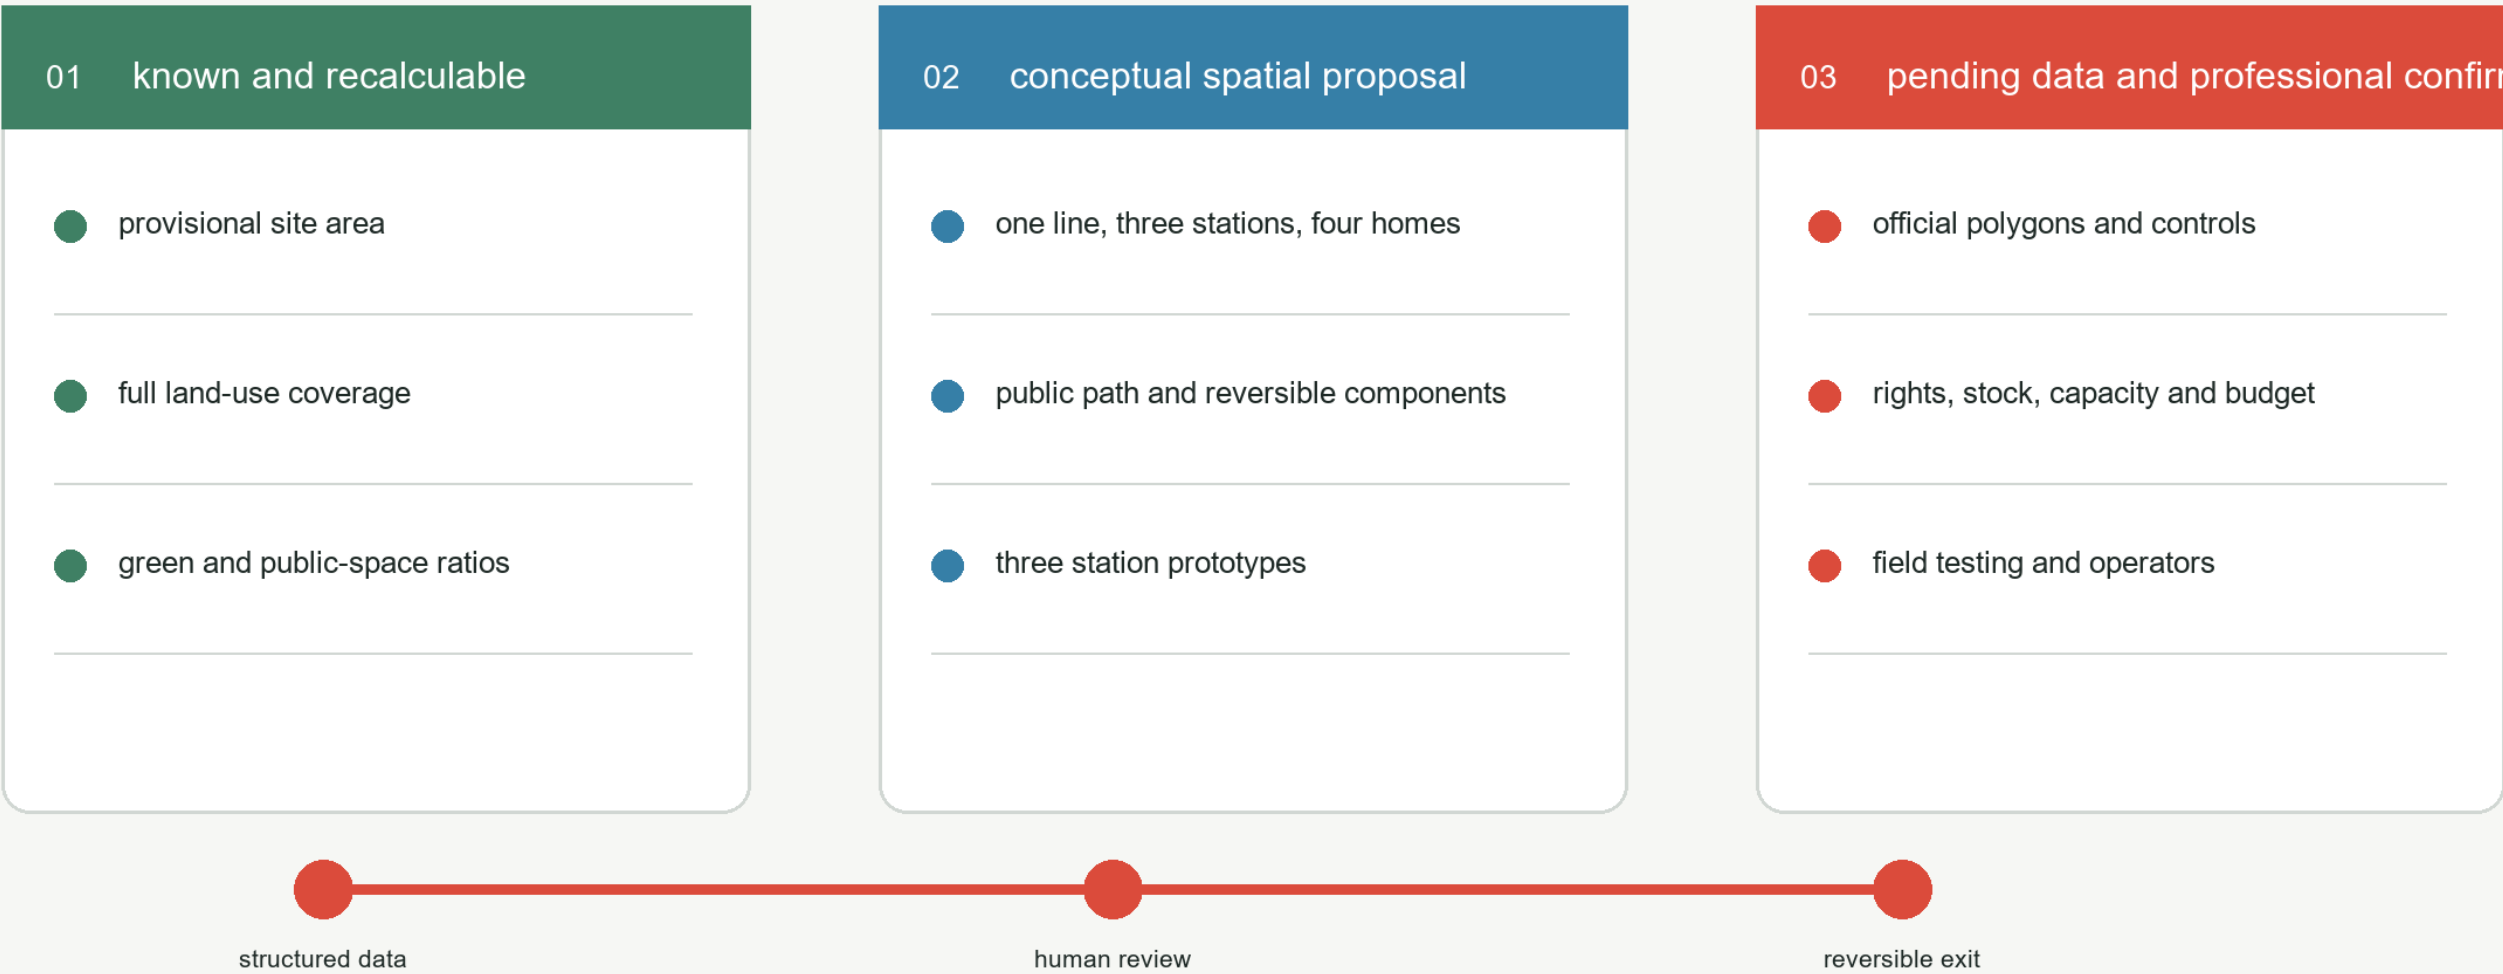

# Evidence boundary

Provisional extent, concepts and pending controls stay distinct

05 / EVIDENCE AND LIMITS

## From spatial proposal to reviewable handoff: known, conceptual and unknown stay separate

Areas and ratios are recomputed from provisional geometry; quantities, rents, capacity, FAR, height and field outcomes stay unknown

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

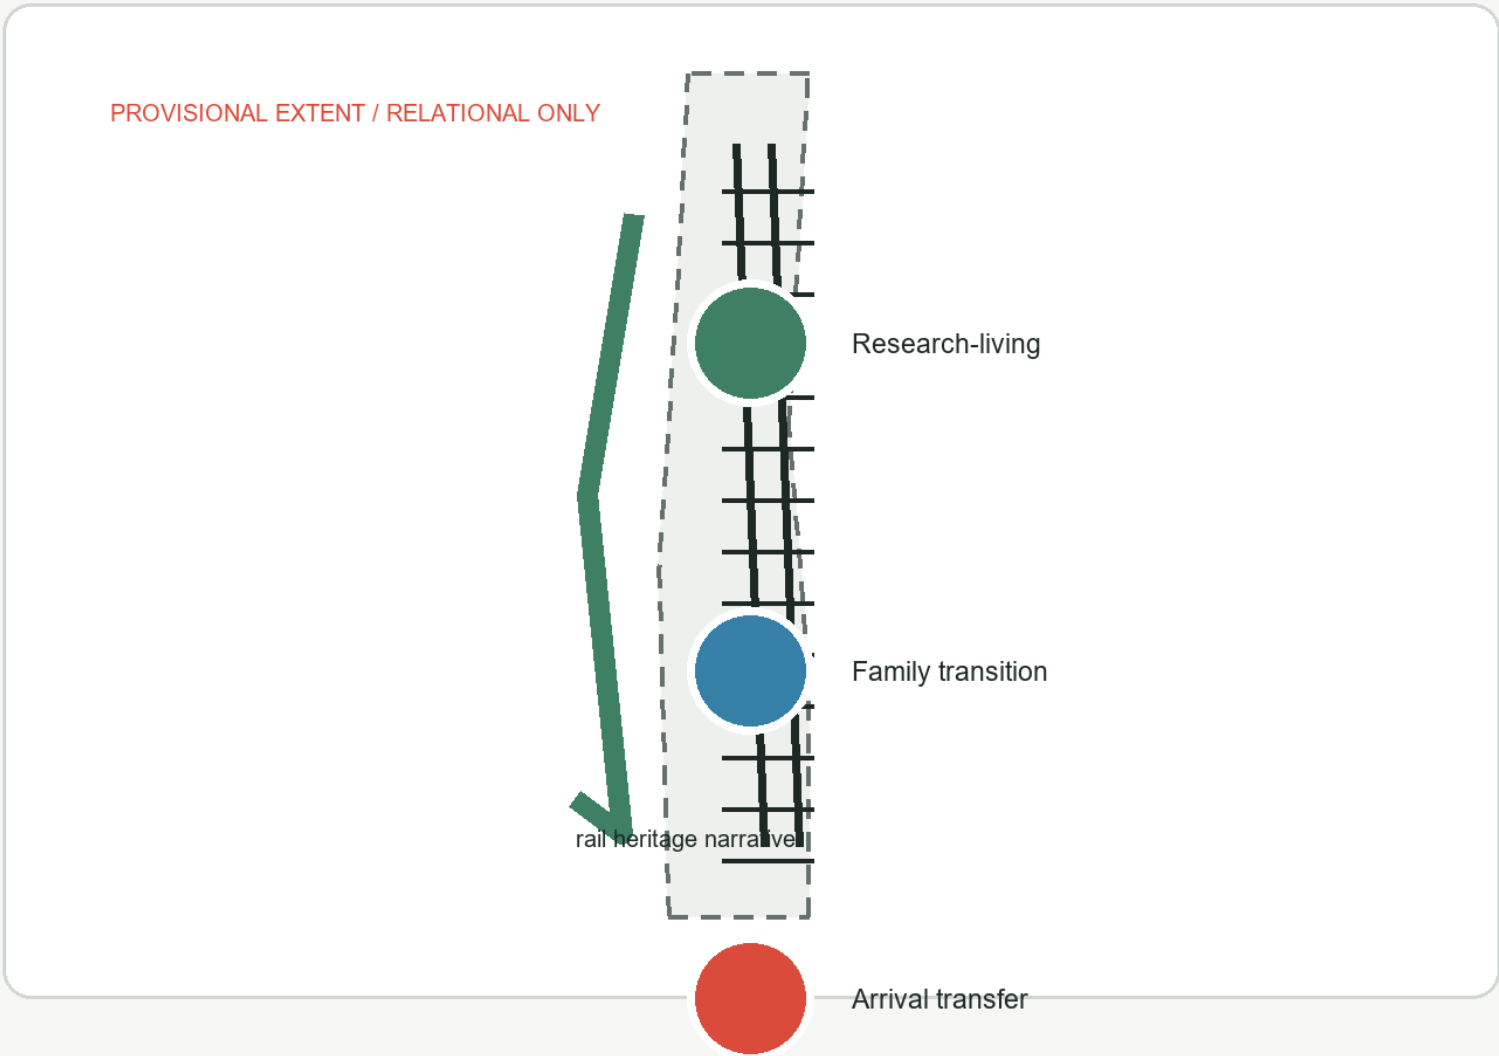

# Spatial backbone

Rail narrative, public route and three stations

01 / SPATIAL BACKBONE

## One public relay spine that can step back

A conceptual relation from rail heritage to doors, courtyards, desks and service entries

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

01 Rail and park

Keep the public path ahead of any building discussion

02 Three stations

Research-living, family transition and arrival respond to different life stages

03 Four dwellings

Short stay, project rental, adaptable home and long-term community coexist

04 Ordinary route

Every digital service keeps a staffed, paper or offline alternative

Provisional constraint is not a redline; replace and recalculate when official polygons arrive

HOME-WORK RELAY / EPSG:4548 recomputation

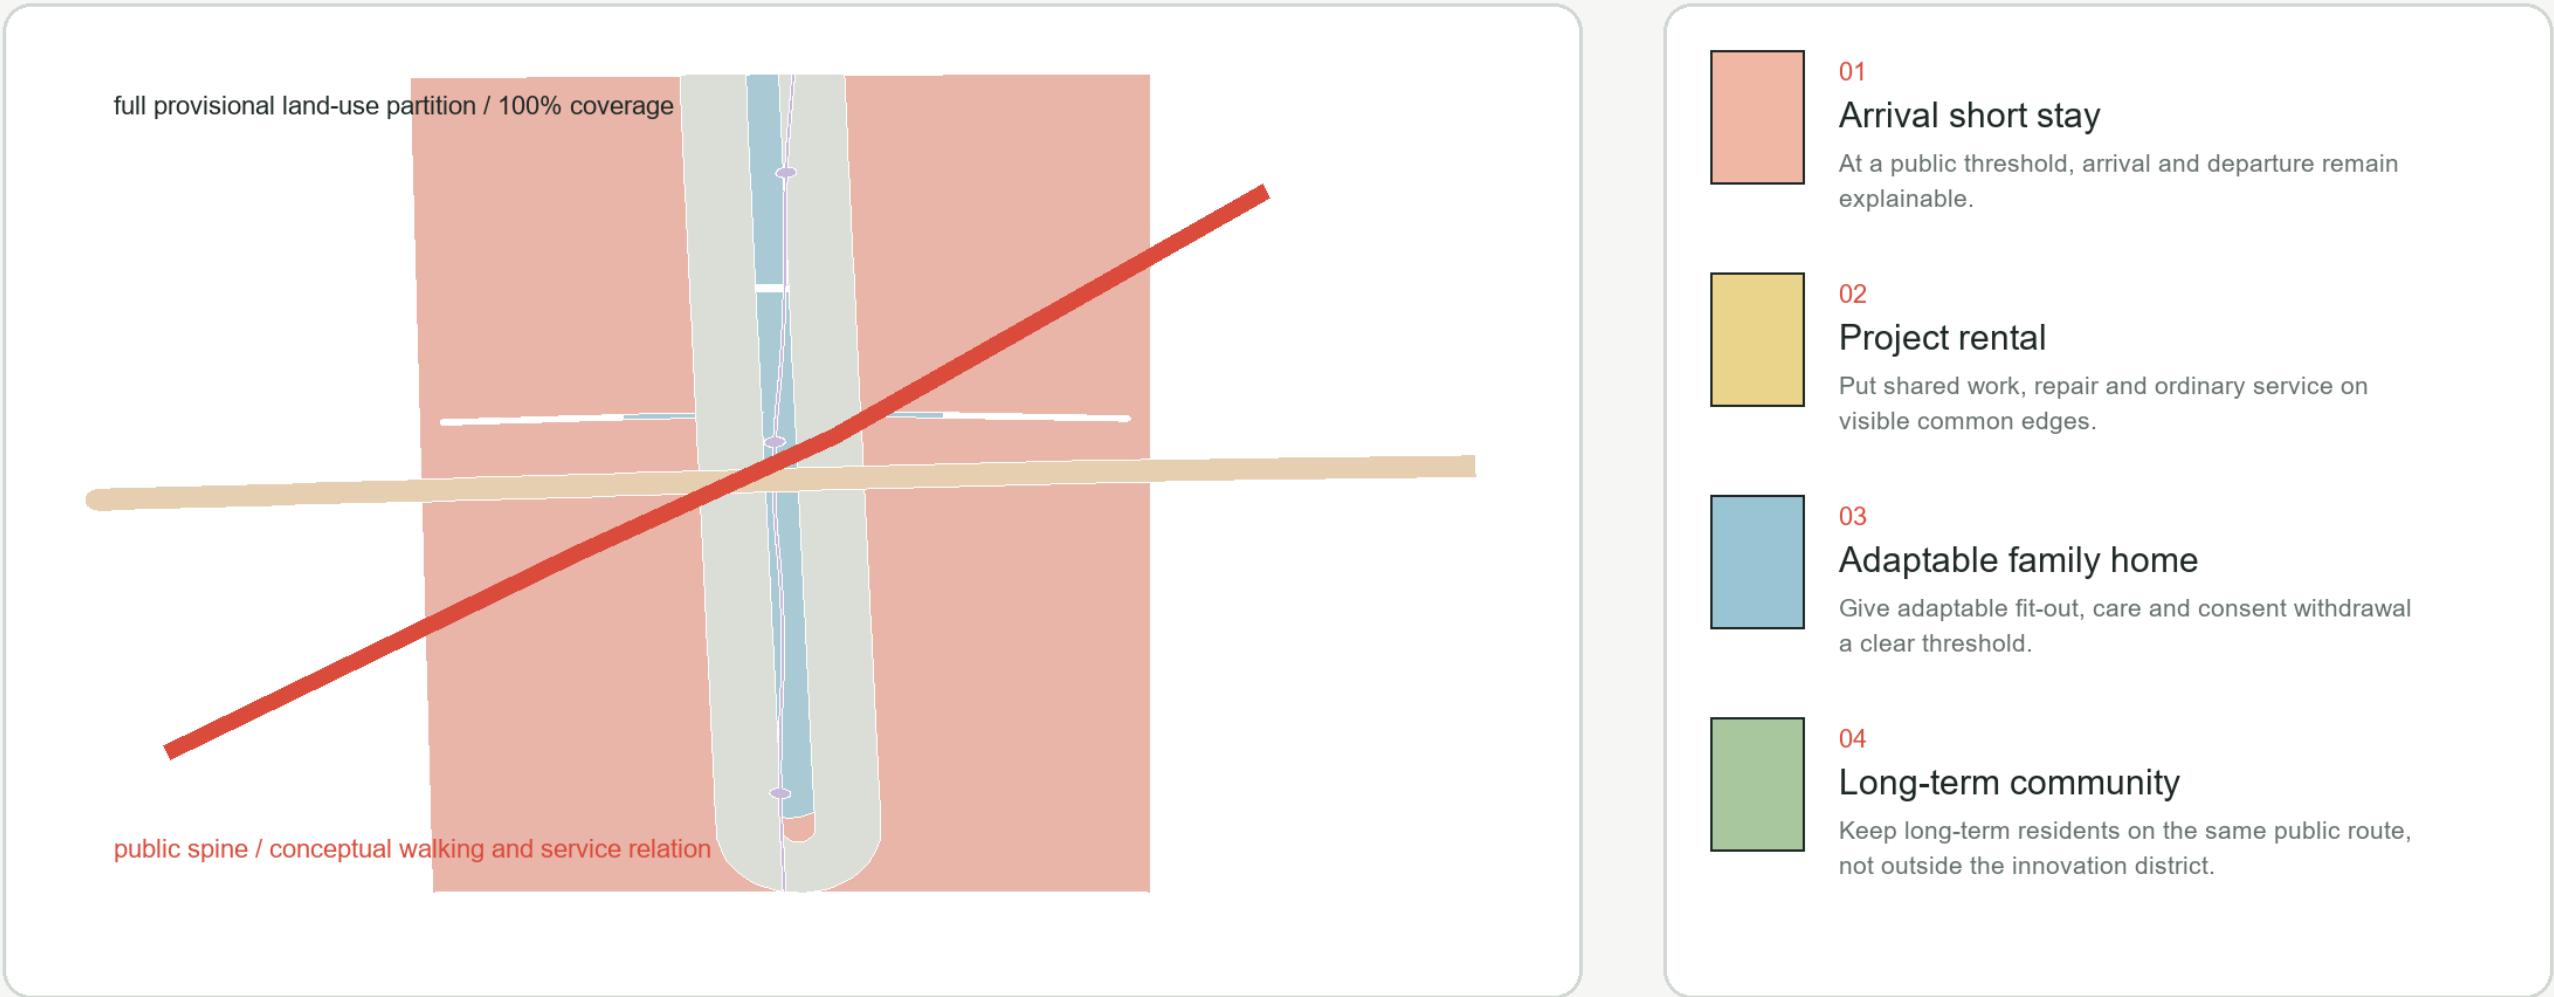

# Four dwellings

Arrival stay, project rental, adaptable home and long-term community

02 / LAND AND BUILDING LOGIC

## Spatial skeleton: public corridor, adaptable edges and four dwelling prototypes

Land-use remains a full provisional partition; building prototypes do not state current stock, units, floors or ownership

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

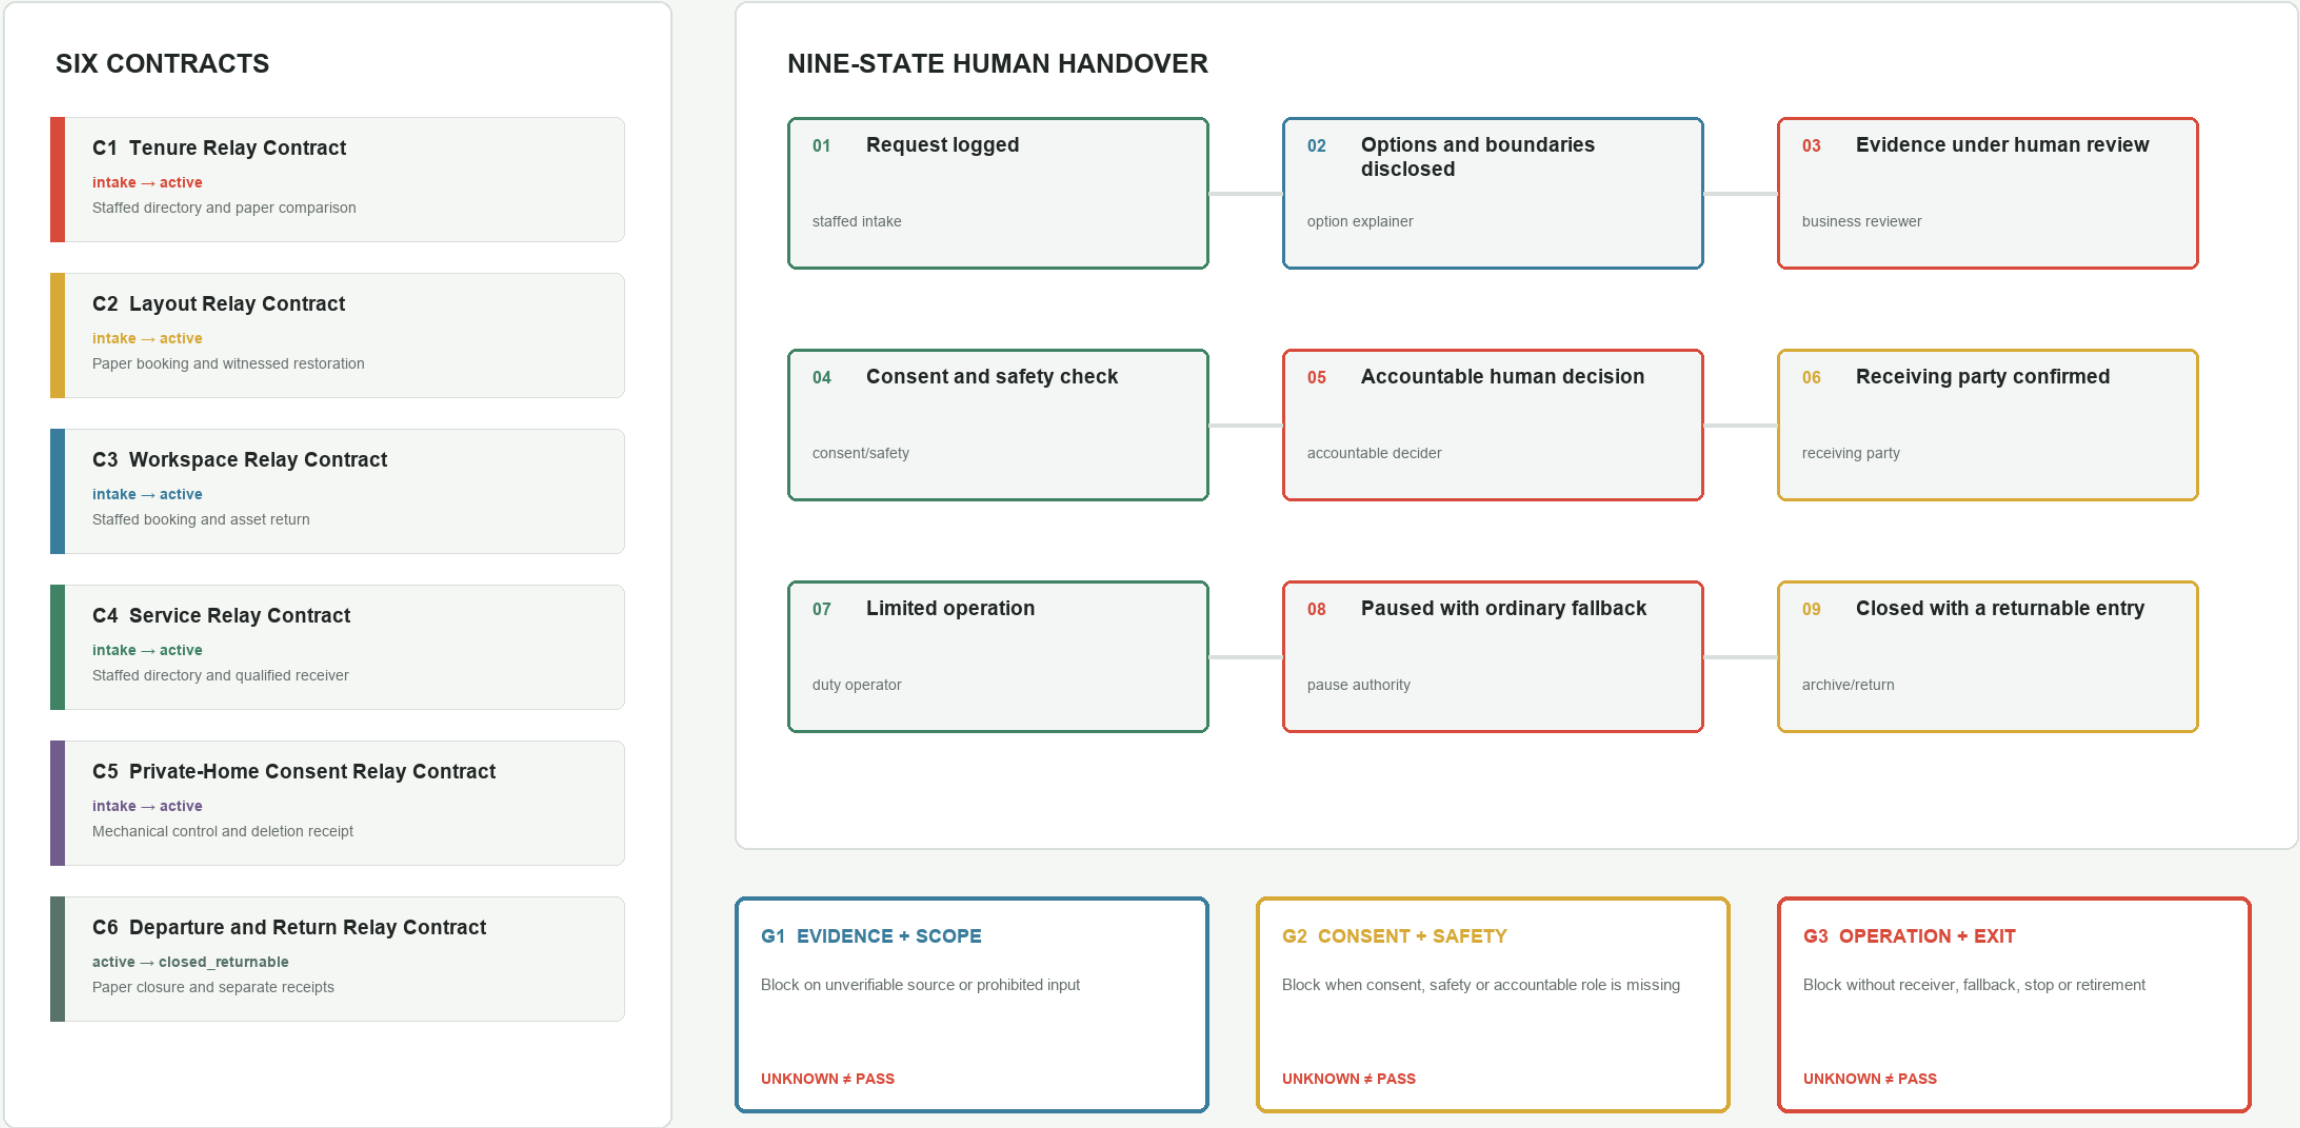

# Six relays

Term, unit, desk, service, consent, departure and return

07 / HOME-WORK RELAY CONTRACT

## SIX CONTRACTS MAKE EVERY RELAY STOPPABLE AND RECEIVABLE

Nine states + three human evidence gates; a valid desktop structure is not a field outcome

DERIVED FROM: visual/assets/relay-contracts.json + relay-contract.validation.json

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

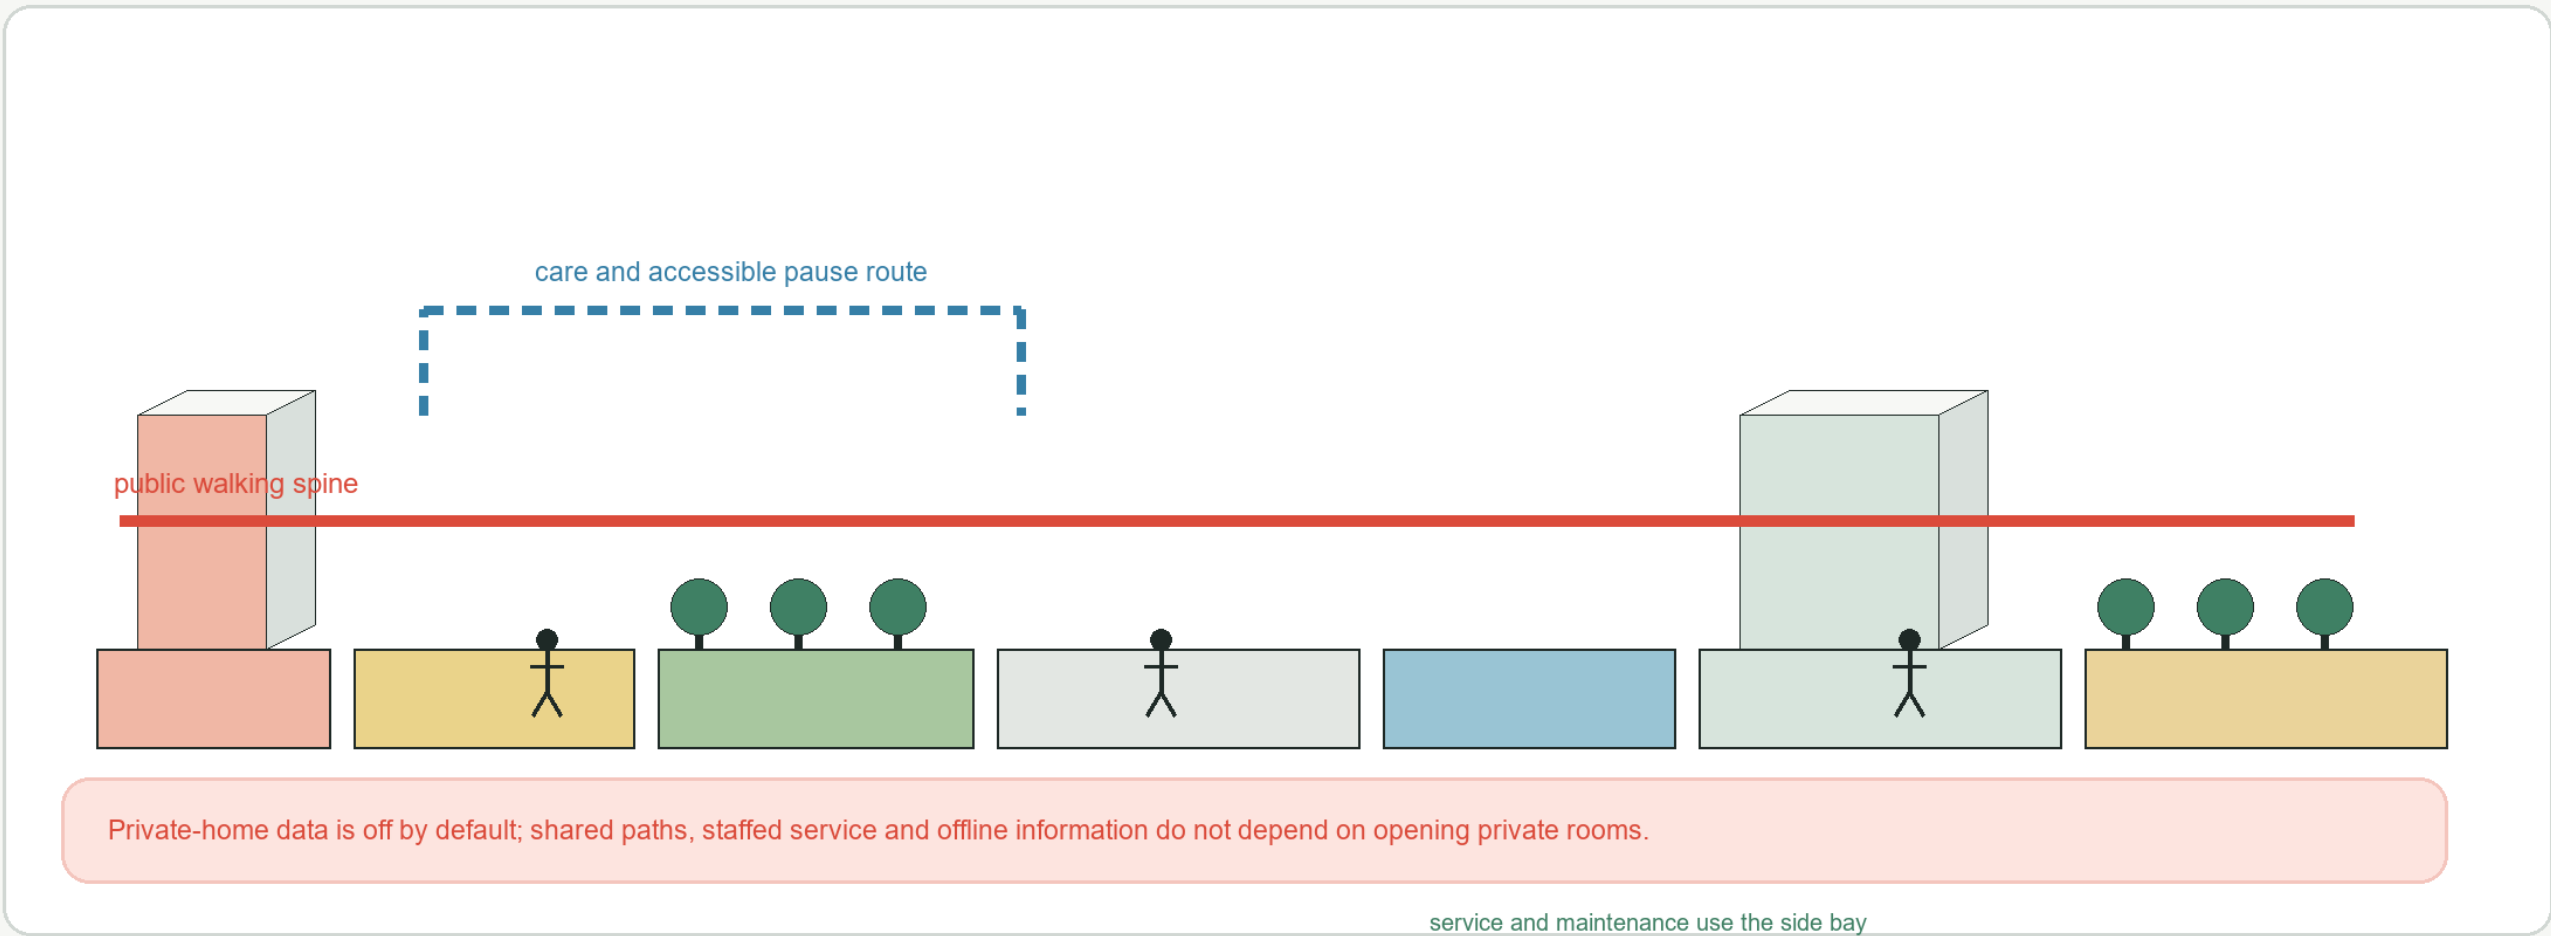

# Railway grammar for public space

Shunting, coupling and through service become doors, courts, paths and return tickets

04 / PUBLIC-REALM SECTION

## Door to desk: walking, rain, care and service flows do not collapse into one line

A conceptual section for public edges and separation principles; not a road, utility or accessibility acceptance drawing

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

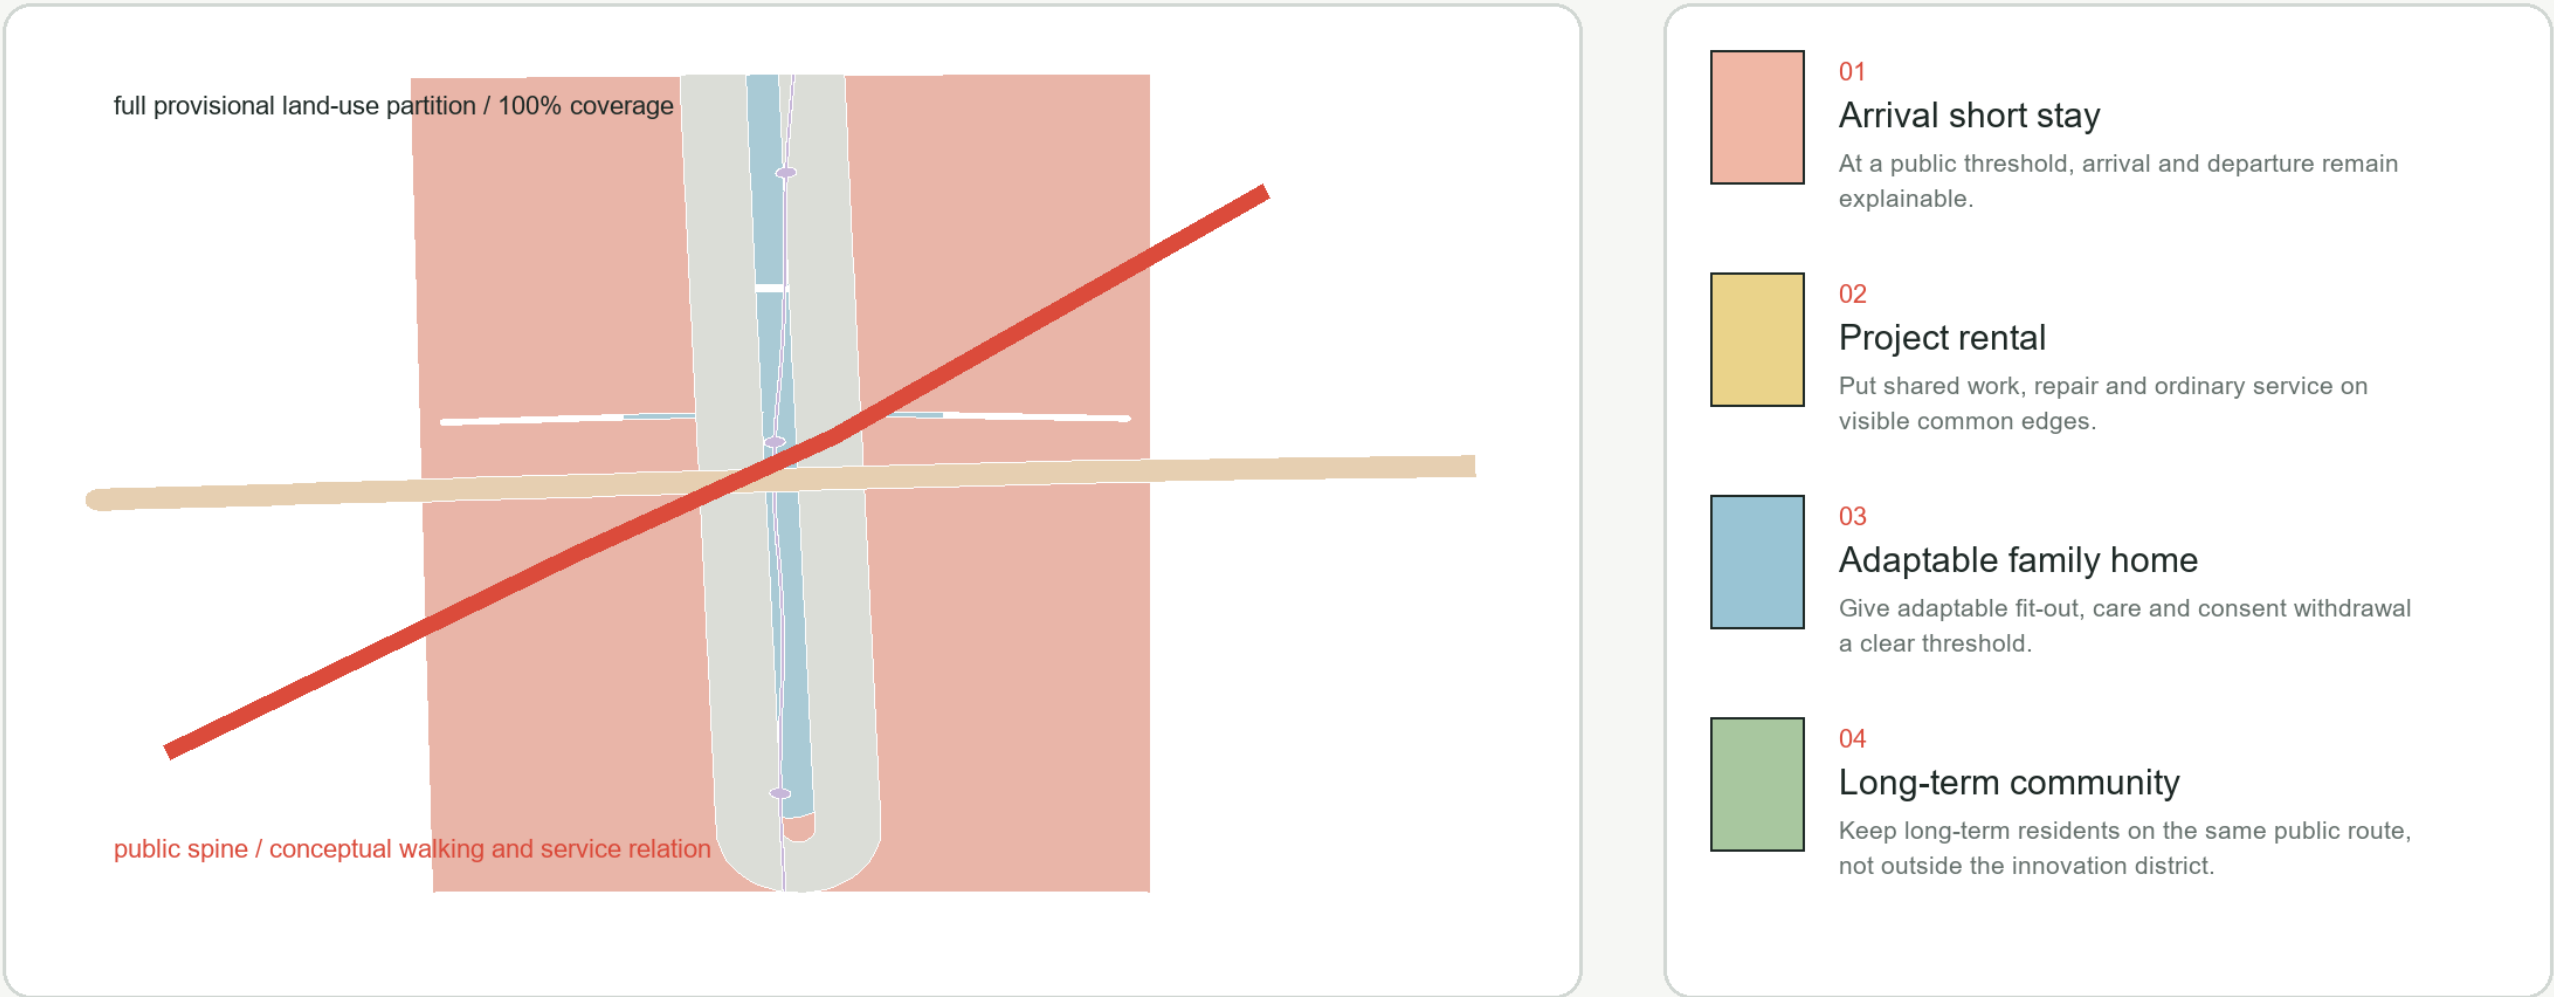

# Long-life frame, short-life fit-out

Keep change and maintenance possible without replacing professional review

02 / LAND AND BUILDING LOGIC

## Spatial skeleton: public corridor, adaptable edges and four dwelling prototypes

Land-use remains a full provisional partition; building prototypes do not state current stock, units, floors or ownership

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

# Zhongzhiyuan research-living station

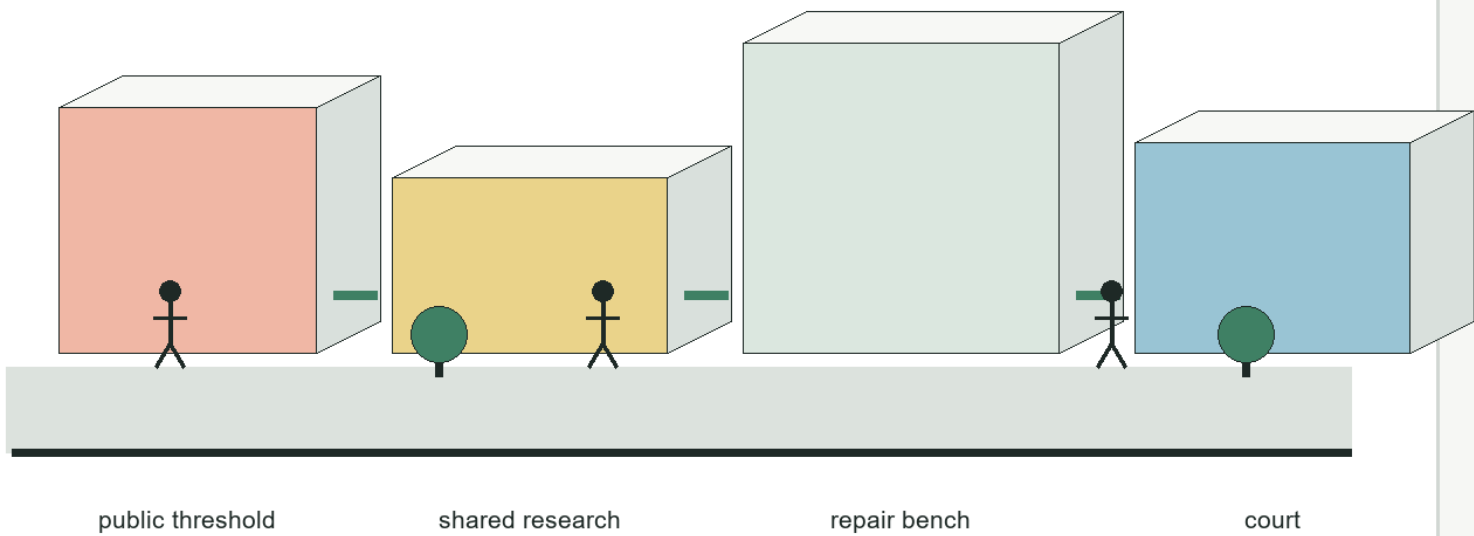

Research, shared work, repair and public court

06.1 / RESEARCH-LIVING SECTION

## Zhongzhiyuan: research-living court and reversible fit-out

Relative section and component relations; no building height, engineering dimension or fixed location

relative section / height unknown

### spatial rules

- 1 public before private  
threshold, court and explanation desk stay visible
- 2 long-life frame  
envelope, fit-out and service equipment can change separately
- 3 care and repair use side entries  
do not cross private rooms or trade consent for basic service
- 4 offline and staffed routes persist  
each transition can pause, explain, roll back and be decided again

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

# AI Origin family-transition station

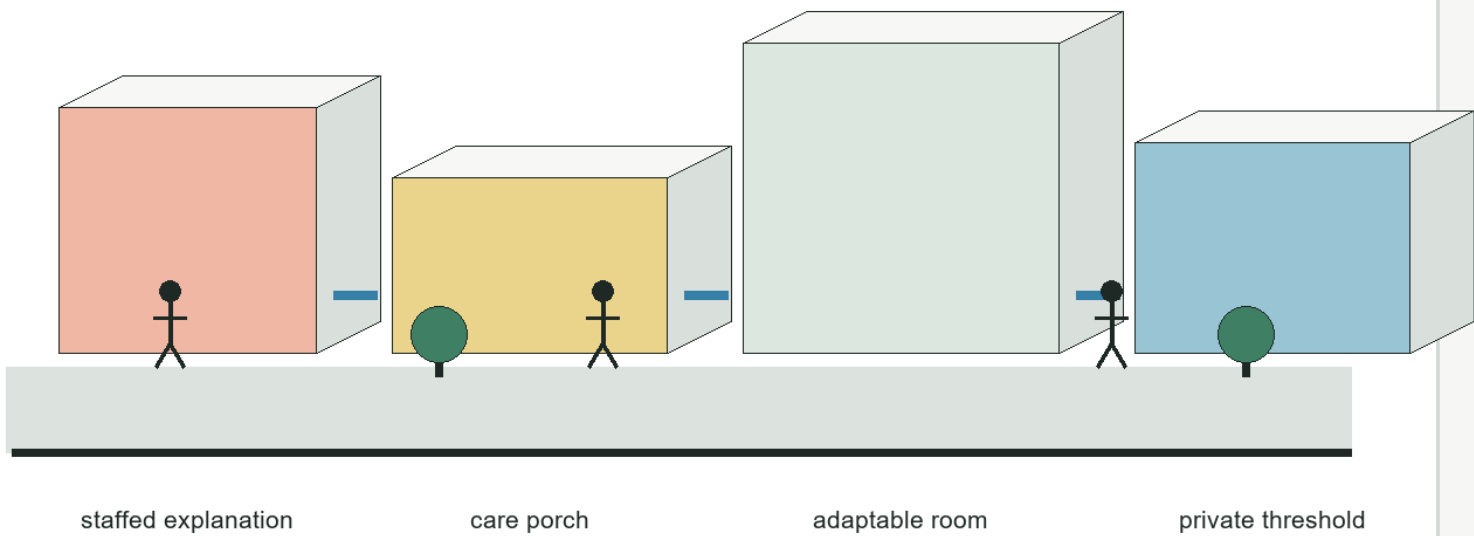

Care, adaptable rooms and private consent threshold

06.2 / FAMILY TRANSITION SECTION

## AI Origin: care porch and adaptable family home

Relative section and component relations; no building height, engineering dimension or fixed location

relative section / height unknown

### spatial rules

- 1 public before private  
threshold, court and explanation desk stay visible
- 2 long-life frame  
envelope, fit-out and service equipment can change separately
- 3 care and repair use side entries  
do not cross private rooms or trade consent for basic service
- 4 offline and staffed routes persist  
each transition can pause, explain, roll back and be decided again

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

# Dazhongsi arrival-transfer station

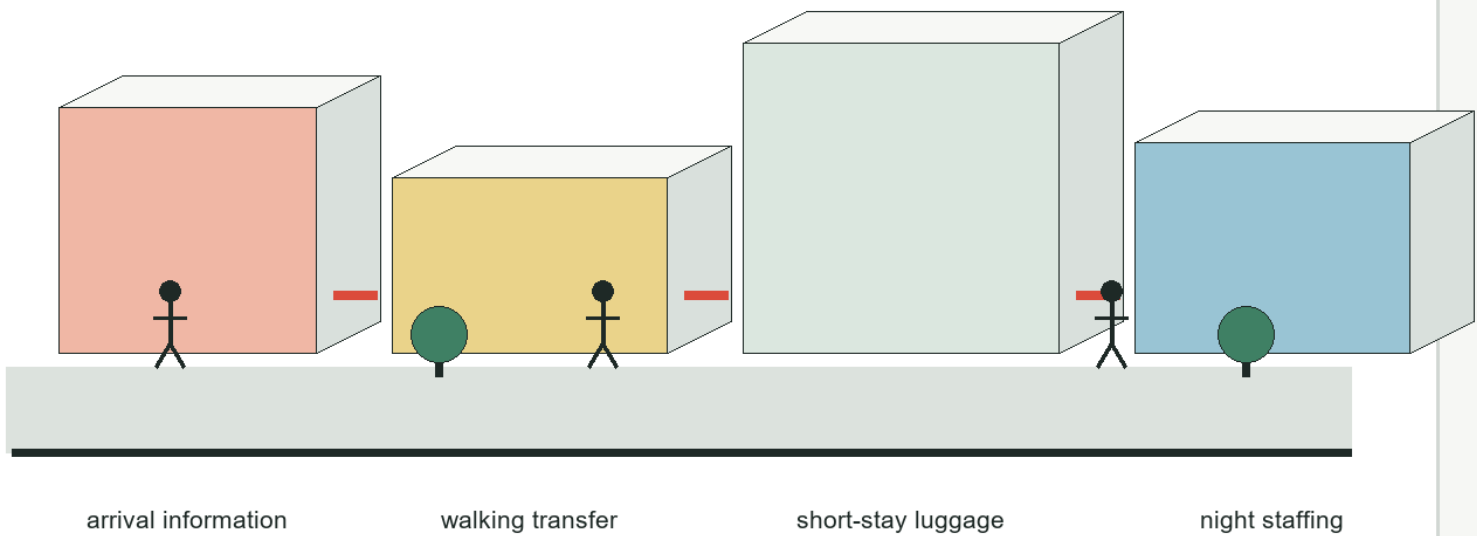

Arrival explanation, walking transfer and night staffing

06.3 / ARRIVAL-TRANSFER SECTION

## Dazhongsi: arrival transfer and night staffing

Relative section and component relations; no building height, engineering dimension or fixed location

relative section / height unknown

### spatial rules

- 1 public before private  
threshold, court and explanation desk stay visible
- 2 long-life frame  
envelope, fit-out and service equipment can change separately
- 3 care and repair use side entries  
do not cross private rooms or trade consent for basic service
- 4 offline and staffed routes persist  
each transition can pause, explain, roll back and be decided again

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

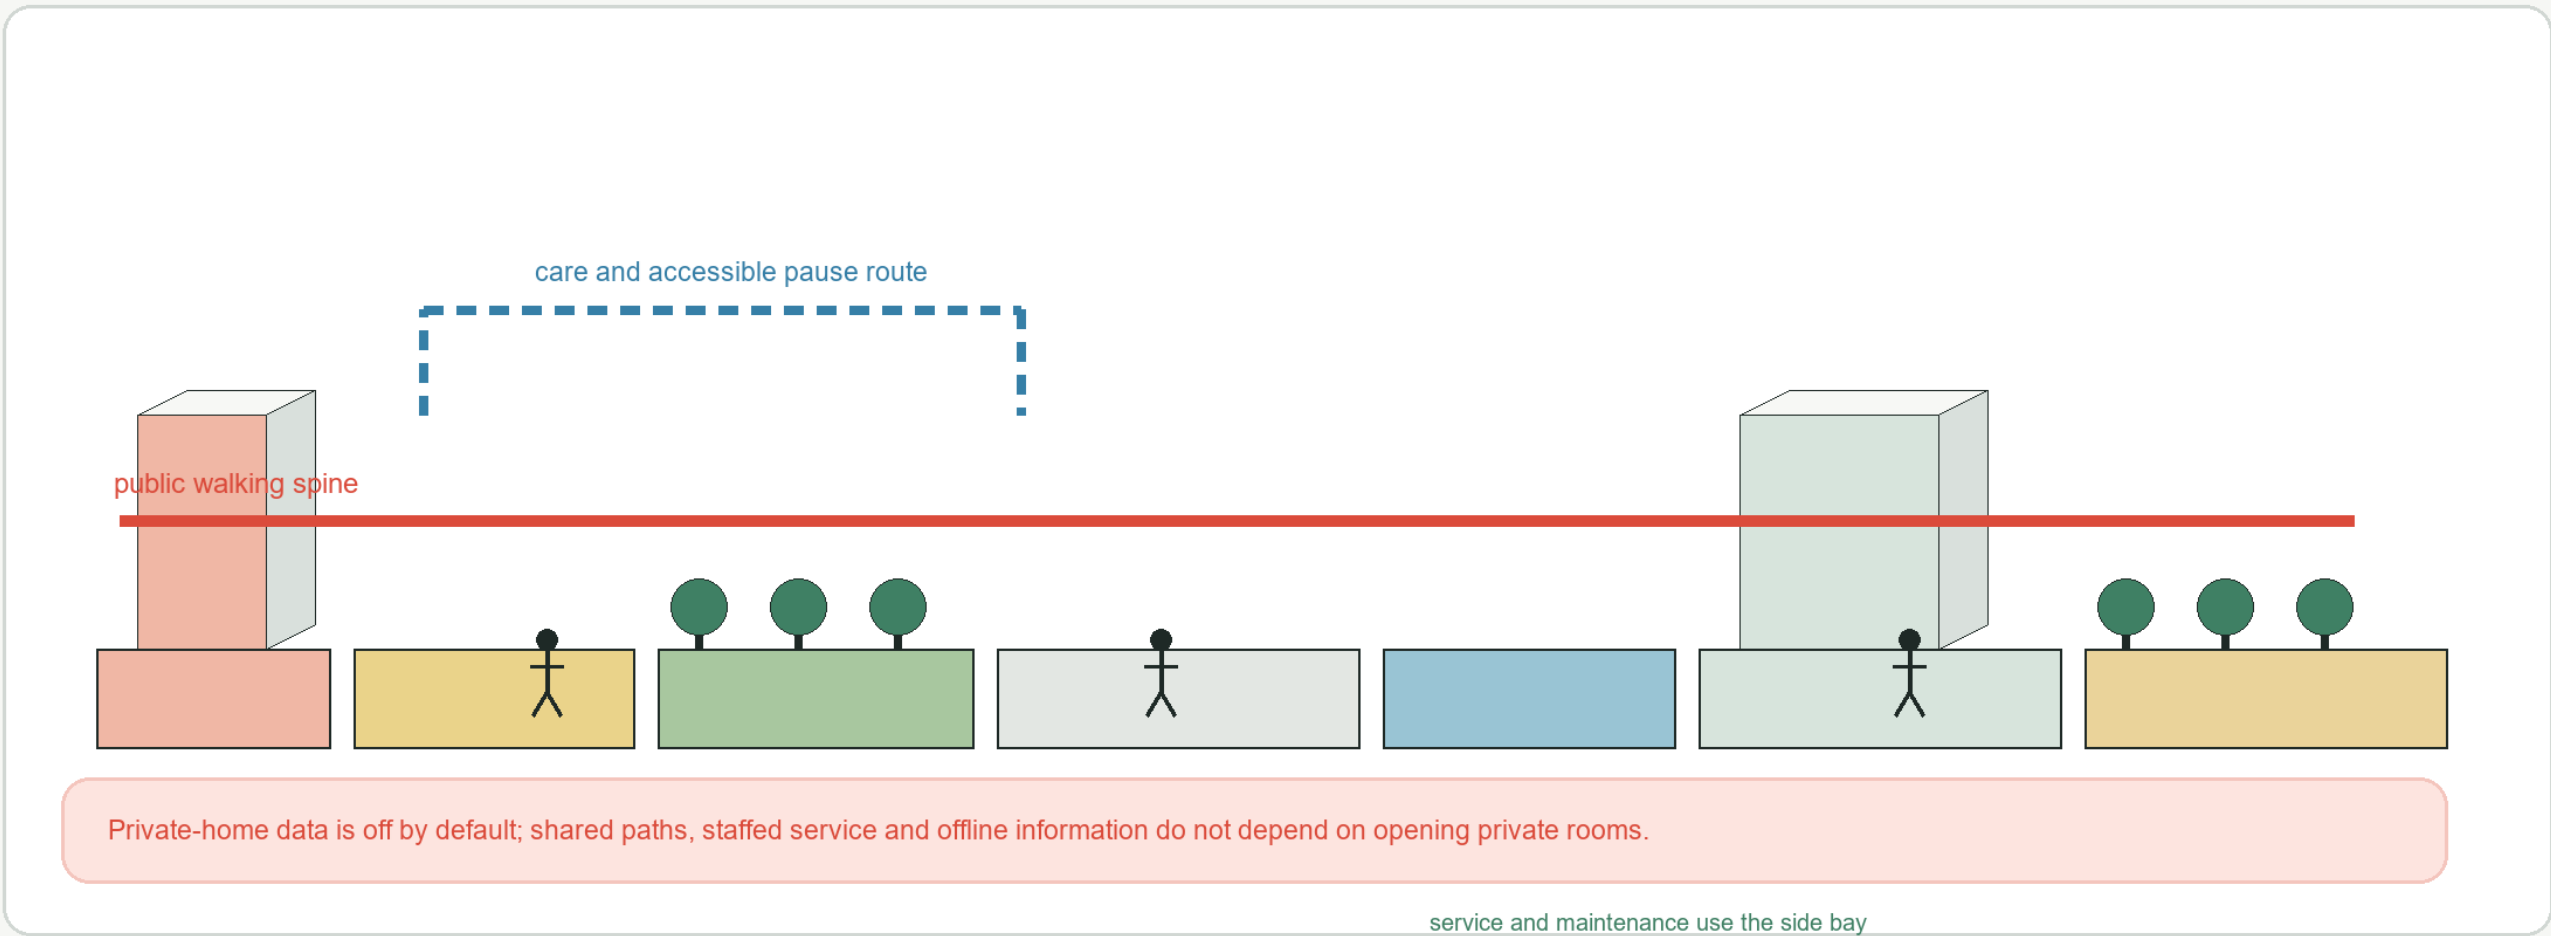

# Door to desk public edge

Walking, rain, pause, care and service flows are layered

04 / PUBLIC-REALM SECTION

## Door to desk: walking, rain, care and service flows do not collapse into one line

A conceptual section for public edges and separation principles; not a road, utility or accessibility acceptance drawing

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

# Twelve scenario cards

Every digital entry retains staffed, offline and exit routes

10 / EQUITY + OPERATIONS

## LEAST-SERVED ROUTES SHARE ONE DENOMINATOR; STATUS IS AUDITABLE

Six equity gates + six status levels + steward, service clocks and retirement; protocol, not performance

### SIX PERSONAS × SIX ACCEPTANCE RULES

- P01 New researcher**  
AI-off and human routes must reach the same legally available service outcome without an extra eligibility barrier.

**EQ-01 Equivalent core outcome**
- P02 Startup team**  
Choosing no AI, withdrawing consent or requesting accommodation must not itself increase price or remove a basic service.

**EQ-02 No price or rights penalty**
- P03 Young family**  
Every registered request is classified as completed, withdrawn, failed, deferred or missing-receiver; no silent deletion.

**EQ-03 Failures and withdrawals remain in the denominator**
- P04 International developer**  
Every open window publishes a receiving role, ordinary channel, escalation path and review date.

**EQ-04 Human receipt and complaint closure**
- P05 Service and maintenance worker**  
Requested accommodation is tested through the complete route and unresolved breaks stop that route from being called accessible.

**EQ-05 Reasonable accommodation works in practice**
- P06 Older and disabled user**  
A handover is not complete until both the releasing and receiving roles record independent confirmation or an explicit refusal.

**EQ-06 Release and receipt confirmed separately**

RESULTS UNKNOWN · FAILURES STAY VISIBLE

### STATUS + STEWARDSHIP

- CONCEPT SUBMISSION
- UNDER REVIEW
- SELECTED
- AUTHORIZED PILOT
- APPROVED PROJECT
- BUILT AND OPERATING
- STEWARD

- Bilingual terms
  - Sources + rights
  - Status labels
  - Withdrawal + credit
  - Failure + retirement

Pause content or service on disputed status/source, broken ordinary route, failed withdrawal or absent owner.

### ANNUAL RELAY WEEK = PUBLIC AUDIT, NOT A PROMOTIONAL SUMMIT

protocol clinic / ordinary-route walk audit / reversible-fit-out open review / default-deny negative test / departure-return archive session / regional interface roundtable

PROPOSED · NOT SCHEDULED · PERMISSION / INSURANCE / ACCESSIBILITY / RIGHTS REQUIRED

DERIVED FROM: visual/assets/equity-acceptance.json + brand-operations.json

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

# Three industry validations

Reversible fit-out, work-home adjacency, private home off by default

08 / 90-DAY PILOT + VALIDATION

## NINETY DAYS ADVANCE EVIDENCE, NOT PREPAID OUTCOMES

Shadow rehearsal -> reversible micro-pilot -> joint review; every test has a baseline, instrument, stop and human sign-off

Day 1-30

Shadow rehearsal

Replay requests, human receipt, ordinary routes, withdrawal and missing receivers without changing eligibility, contracts or space.

DELIVERfailure ledger / accepted RACI / P2 record

Day 31-60

Reversible micro-pilot

Test three industry-validation protocols and human takeover only in authorized, reversible mock-up or service-desk settings.

DELIVERraw test / calibration / stop + recovery

Day 61-90

Joint review and retirement decision

Professionals, user representatives and operational roles decide whether to revise, continue within limits, retire or wait for evidence.

DELIVERjoint audit / equity / retire-or-wait decision

V1

Reversible Fit-Out Validation

BASELINE

authorized room and component inventory

INSTRUMENT

versioned drawing and component register

PROPOSED GATE

no unresolved safety or egress nonconformity

STOP

unexpected structural or fire issue

NOT AUTHORIZED · NOT RUN

V2

Live-Work Adjacency Noise and Safety Validation

BASELINE

authorized boundary between domestic and work areas

INSTRUMENT

calibrated sound level meter used by a qualified role

PROPOSED GATE

applicable acoustic and safety thresholds set by qualified reviewers before the test

STOP

applicable threshold exceeded

NOT AUTHORIZED · NOT RUN

V3

Private-Home Default-Deny Validation

BASELINE

complete device and data-flow inventory

INSTRUMENT

local network observation appropriate to the device

PROPOSED GATE

zero unauthorized transmission while consent is off

STOP

any unauthorized transmission

NOT AUTHORIZED · NOT RUN

5 RACI WORKSTREAMS | COST = STAFF + SPACE + CALIBRATION + ACCESS + SAFETY + MAINTENANCE + EXIT | CAPACITY = MIN(4 BOTTLENECKS) | ALL OPERANDS UNKNOWN

DERIVED FROM: visual/assets/pilot-protocol.json + assumptions.json

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

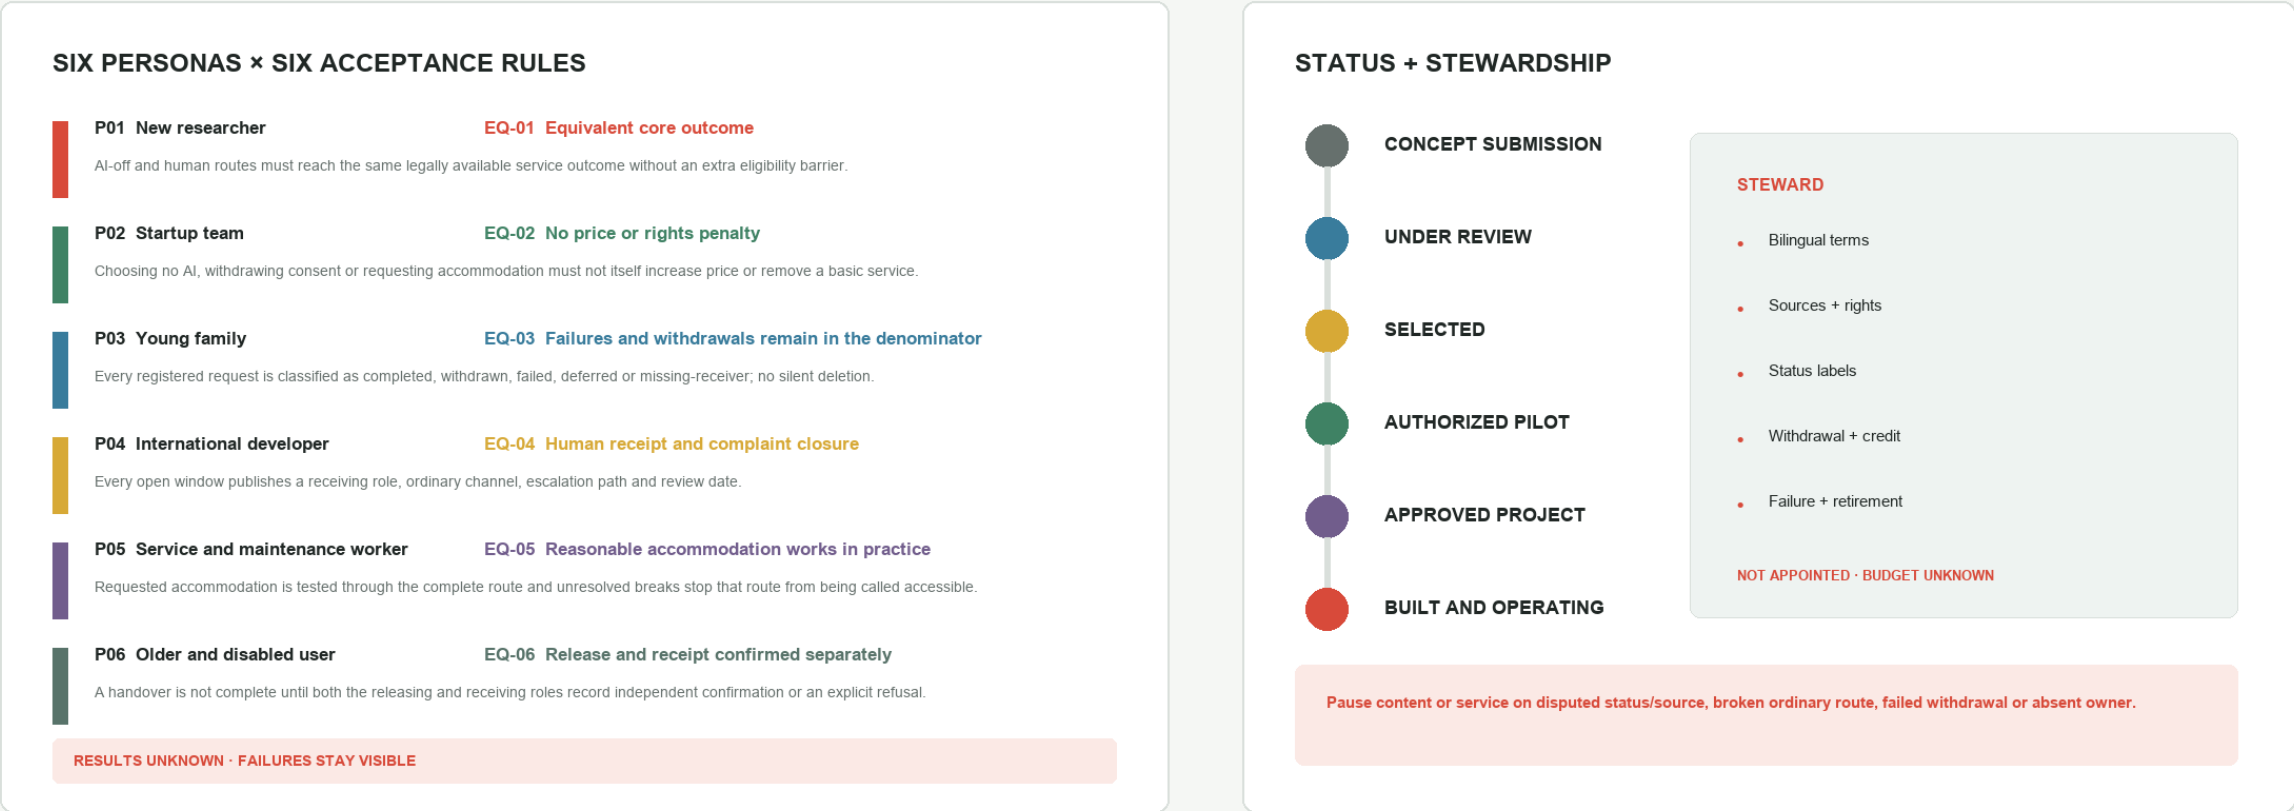

# Annual relay week

A conceptual community and developer exchange mechanism

10 / EQUITY + OPERATIONS

## LEAST-SERVED ROUTES SHARE ONE DENOMINATOR; STATUS IS AUDITABLE

Six equity gates + six status levels + steward, service clocks and retirement; protocol, not performance

ANNUAL RELAY WEEK = PUBLIC AUDIT, NOT A PROMOTIONAL SUMMIT

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

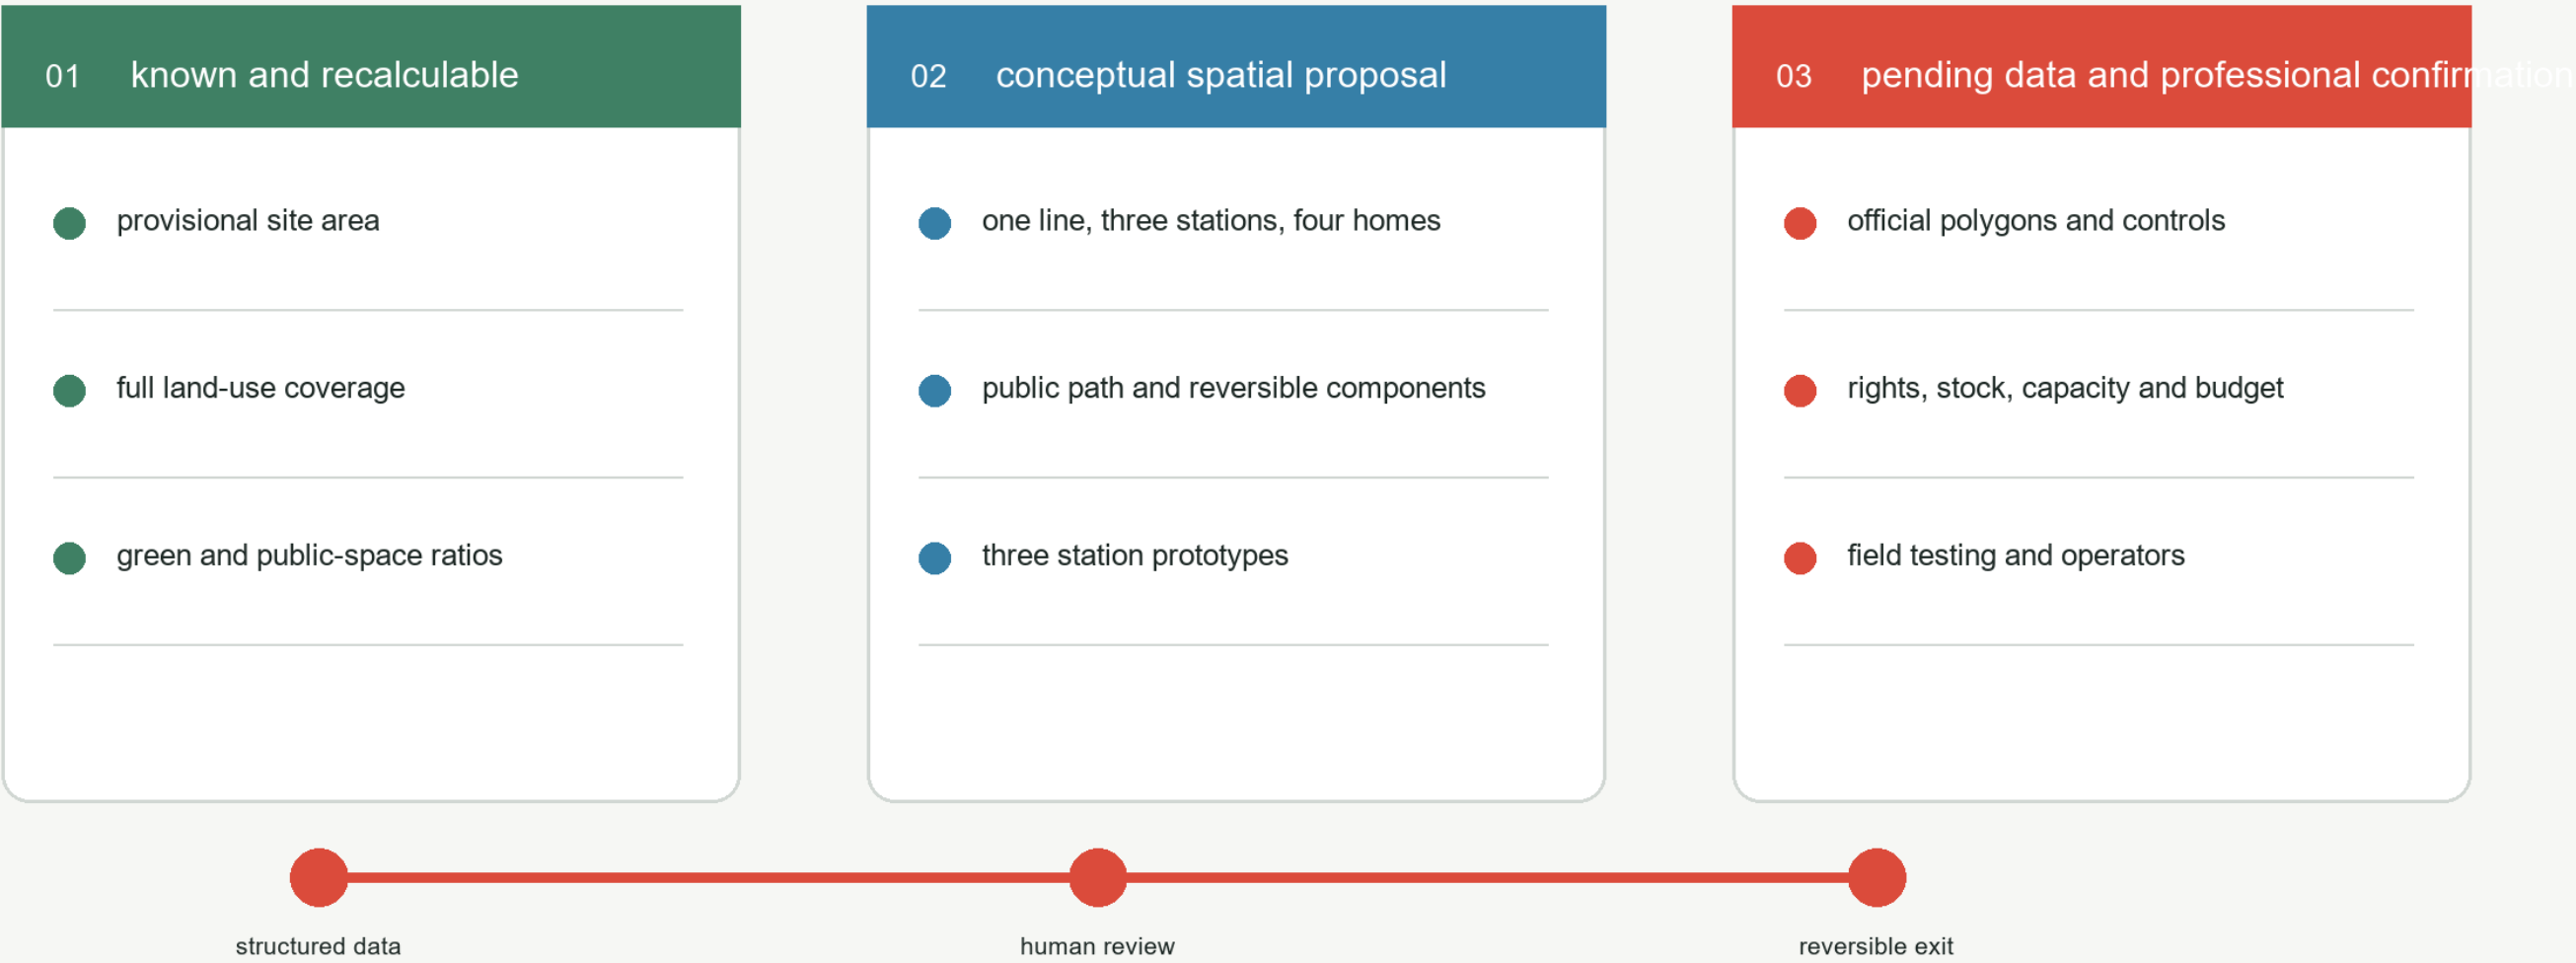

# Metrics and unknowns

Recalculable areas and ratios; unknowns do not decorate claims

05 / EVIDENCE AND LIMITS

## From spatial proposal to reviewable handoff: known, conceptual and unknown stay separate

Areas and ratios are recomputed from provisional geometry; quantities, rents, capacity, FAR, height and field outcomes stay unknown

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

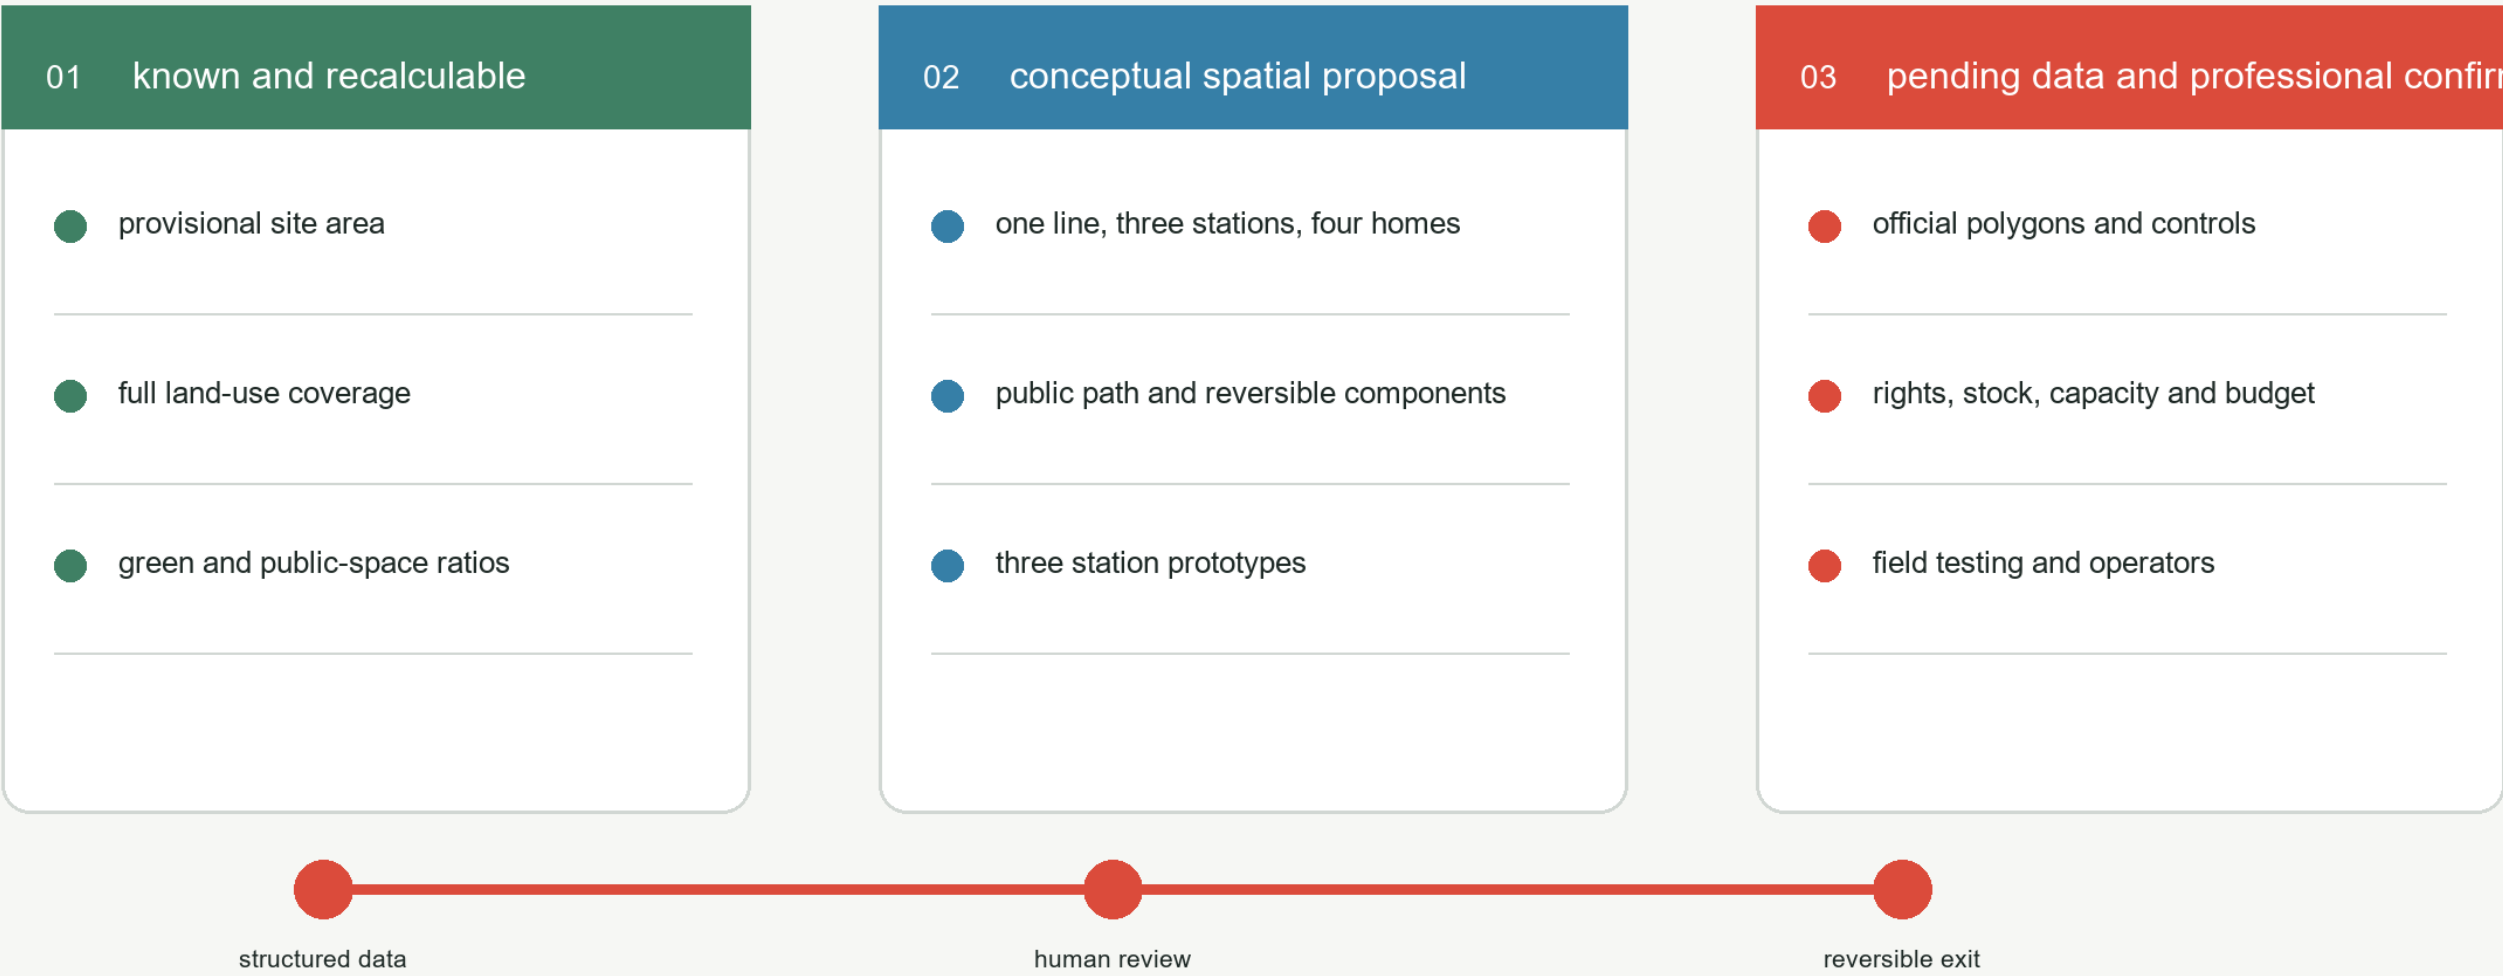

# Sources, rights and limits

Original diagrams, public sources, provisional geometry and conditions for professional work

05 / EVIDENCE AND LIMITS

## From spatial proposal to reviewable handoff: known, conceptual and unknown stay separate

Areas and ratios are recomputed from provisional geometry; quantities, rents, capacity, FAR, height and field outcomes stay unknown

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

HOME-WORK RELAY / EPSG:4548 recomputation

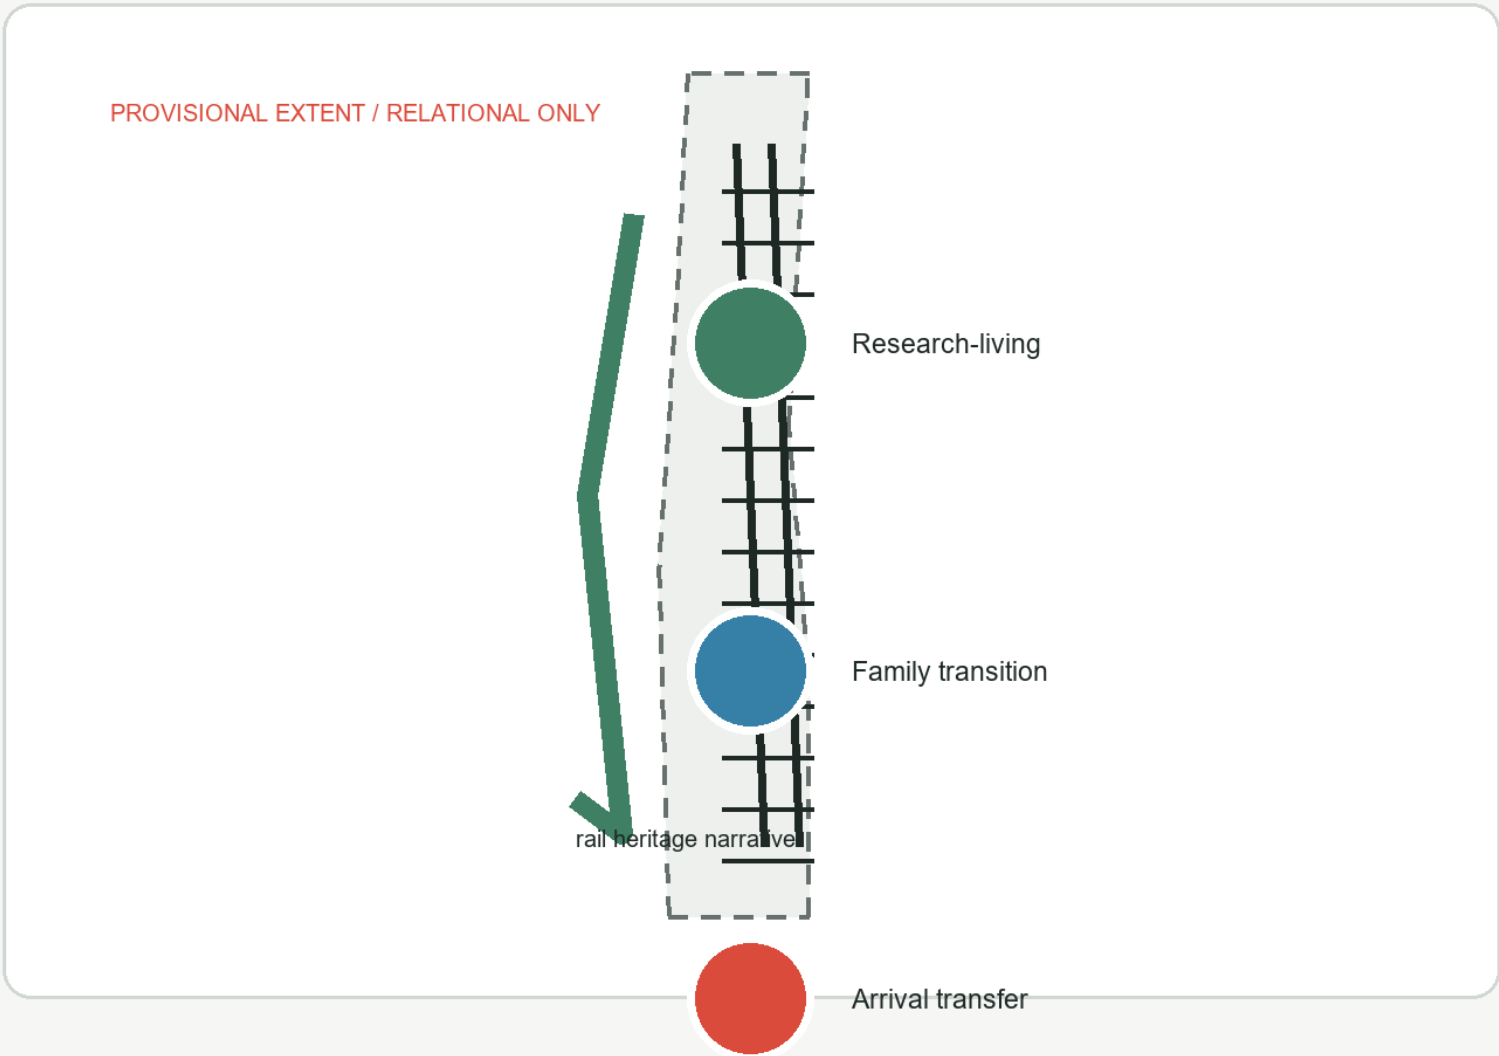

# Return ticket

Departure is not a disconnection; re-entry still requires a new human decision

01 / SPATIAL BACKBONE

## One public relay spine that can step back

A conceptual relation from rail heritage to doors, courtyards, desks and service entries

Derived from provisional geometry and design layers; conceptual, pending official data and professional review

01 Rail and park

Keep the public path ahead of any building discussion

02 Three stations

Research-living, family transition and arrival respond to different life stages

03 Four dwellings

Short stay, project rental, adaptable home and long-term community coexist

04 Ordinary route

Every digital service keeps a staffed, paper or offline alternative

Provisional constraint is not a redline; replace and recalculate when official polygons arrive
